

HELEN DILLER PLAYGROUND

SAN FRANCISCO, CALIFORNIA
Project Highlight

Installation	2012
Project for	San Francisco Recreation and Park Dept.
Features	Powder Coated Atlantis Truss Aluminum Mesh Railing Composite Wood Decking Composite Wood Cladding

Project Summary

San Francisco's favorite children's park, Helen Diller playground features slides, climbing walls, unique structures and an aluminum GatorBridge. The powder coated red bridge features eco-friendly composite wood decking and cladding. From the bridge you can see sweeping views of the downtown cityscape. San Francisco Recreation and Park Department and their landscape architects sought out GatorBridge to design and fabricate an ADA compliant bridge that would compliment the beautiful landscape designs and architectural playground elements.
