

Orange Reservoir West Orange, New Jersey

PROJECT SUMMARY

For Essex County attracting more visitors to the Orange Reservoir called for improvements to the area, including the addition of two pedestrian bridges along a 1.75-mile walking path. The desire for custom bridges that mirrored an "historic" look without the customary maintenance associated with steel structures was achieved. Enhancing the natural landscape, these bridges invite guests to simply enjoy the beauty of what the location has to offer.

Installation
April 2014

Project for
South Mountain Recreation Complex
