

## Tactical Village Catwalks

Washington DC

### PROJECT SUMMARY

The aluminum catwalks at Tactical Village provide supervisors with a bird's eye view of training drills. The contractor working on the project contacted GatorBridge for a custom engineered solution for the police and SWAT team training facility. The resulting catwalks' design borrows heavily from Gator's DRI gangway featuring an integrated truss handrail. Our grated aluminum deck on the raised walkways allows maximum visibility for supervisors. Gator is proud to have our aluminum structures working for those who protect.

### Installation

2013

### Project for

Metropolitan DC Police Department

### Features

- 11 Catwalks
- 4 Custom Support Columns
- 2 Sets of Custom Aluminum Stairs
