

### BROWARD COUNTY BRIDGE

Lake Worth, Florida

One of the larger structures fabricated by the team at Gator this bridge provides residents connections to the City's Veterans Park and NW 39th Street Greenway, a multi-purpose pathway along the C-13 Canal. To harmonize with the natural landscape of the area, a hunter green powder coating was selected enhancing the aesthetic appeal of the bridge. In addition to manufacturing GatorBridge provided supplementary support through the installation and inspection phases of the project, another added benefit to choosing GatorBridge.
